DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Niori et al (US5800618).

Niori et al discloses a hot plate (14) comprising a resistance heating element (19) formed inside a ceramic substrate (18) wherein the ceramic substrate contains 0.5-10% weight of oxygen and a glossiness of the heating face is 1.5% or more (column 16, line 66-column 17, line 22), the ceramic is subjected to an annealing treatment (column 16, line 66-column 17, line 22), the ceramic substrate is subject to a cold isostatic pressing process before it is sintered (column 16, line 66-column 17, line 22). Although Niori et al does not explicitly state that the heating face of the hot plate is 1.5% or more, Niori et al does disclose blending aluminum nitride powder (a non-oxide ceramic) with yttria (an oxide), placing the blend in a mold and then subjecting the blend to cold isostatic pressing followed by a hot press sintering wherein the density of the substrate is enhanced and the glossiness is adjusted to 1.5% or more.
